

2024 Fertilizing Schedule

Step 1 – Early/Mid April – Crabgrass Preventer and Fertilizer: This initial application uses LESCO Dimension 0.15% 13-0-0 50% Stabilized Nitrogen Pre-Emergent Plus. It prevents crabgrass and enhances color, providing long-lasting control of grassy and broadleaf weeds. Spot spraying for present weeds is included.

Step 2 – May – Broadleaf Weed Control: May focuses on broadleaf weed control using LESCO Three-Way Selective Post Emergent Liquid Herbicide, addressing the peak period for broadleaf weeds. If selected, shrub fertilizer is included in this step.

Step 3 – June – Organic Fertilizer for Healthy Growth: This step introduces GreenEdge Organic/Organic-Base Fertilizer 6-3-0 100% Bio + Macronutrients for robust grass growth, deep green appearance, and thick root growth. Broadleaf weed control is included.

Step 4 – Late June/July – Grub Control Treatment: Late June/July includes grub control using LESCO Bandit 0.5G Insecticide + Fertilizer. The timing may vary, and broadleaf weed control is incorporated.

Step 5 – September – Organic Fall Fertilizer: September applies LESCO Organic/Organic-Base Fertilizer 28-0-3 20% PolyPlus OPTI45 35% Bio 0.7% Fe, promoting healthy grass growth and including broadleaf weed control. If selected, shrub fertilizer is included in this step.

Step 6 – October/November – Winterizer Fertilizer: Prepare for winter and promote spring growth with LESCO Organic Fertilizer 32-0-8 30% Polyplus OPTI45 2% Fe in October/November. This ensures your grass is ready for the cold and returns strong and healthy in the spring!

Our program is tailored to meet your lawn's unique needs with a comprehensive 6-step approach, strategically spaced 4-6 weeks apart throughout the year. Please see the overview on the reverse side of this page for our Premium Fertilization & Weed Control Program. We provide approximate visit timeframes due to unpredictable weather, and you'll receive an email a few days before each treatment with the exact date. While it's challenging to provide precise dates, we aim for effective timing to maximize the value of our service. You'll be notified once a treatment is completed. Thank you for considering us!

6 Step Plan:
Includes each step listed.

4 Step Plan:
Includes steps 1, 2, 3, & 5.

2 Step Plan:
Includes steps 1 & 6.
